Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

1. A petition filed under 37 CFR 1.84(a)(2) is required. Any such petition must be accompanied by the appropriate fee set forth in 37 CFR 1.17(h), three sets of color drawings or color photographs, as appropriate, and, unless already present, an amendment to include the following language as the first paragraph of the brief description of the drawings section of the specification:

The patent or application file contains at least one drawing executed in color. Copies of this patent or patent application publication with color drawing(s) will be provided by the Office upon request and payment of the necessary fee.

Color photographs will be accepted if the conditions for accepting color drawings and black and white photographs have been satisfied. See 37 CFR 1.84(b)(2).

Claim Objections

2. Claim 1 is objected to because of the following informalities: the term "the user" in line 9, page 6 should be changed to "a user". Appropriate correction is required.

Claim Rejections - 35 USC § 103

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. Claims 1 and 2 are rejected under 35 U.S.C. 103(a) as being unpatentable over Kowalski (4,010,914) in view of Cawte (5,020,435). Kowalski teaches a detonating cord reel (22) having a drum wrapped with detonating cord, and end flanges (fig. 1). Kowalski does not teach the cord having numerical markings. Cawte teach a detonating cord

Art Unit: 3641

having incremental numerical markings on the cord at predetermined locations along the cord, said numerical markings providing an accurate visual indication of the number of cord increments remaining on the drum (col. 2, lines 5-15). At the time of the invention, it would have been obvious to one ordinarily skilled in the art to have the detonating cord of Kowalski comprise of numerical markings as taught in Cawte for efficiency to eliminate the visual estimation of how much detonating cord is required.

Conclusion

5. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Burrow teaches a cord reel and end flanges, axially spaced on the drum for containing many layers of cord wrapped on the drum (fig. 2).

6. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Lulit Semunegus whose telephone number is (571) 272-6882. The examiner can normally be reached on Mon-Friday.
